Profile

Third-year computer science student looking for a summer 2027 software internship. I have built two full-stack projects, tutor first-year students in programming and work part time at the campus help desk.

Education

B.S. in Computer Science at Georgia State University, Atlanta, GA August 2023 - May 2027
Grade: 3.7 / 4.0
Relevant courses: Data Structures, Algorithms, Databases, Operating Systems, Web Development.

- Dean's List, four semesters

Projects

StudySpot • GitHub February 2025 - May 2025
Web app that shows free study rooms on campus in real time, built with React, Node.js and PostgreSQL. About 300 students used it during finals week.

Budget Buddy September 2024 - December 2024
Android app for splitting shared expenses between roommates. Team project for the mobile development course; I built the sync with Firebase.

Campus Pantry Finder October 2024
Hackathon project at HackGT 2024: a map of free food events on campus. Won the social impact prize with a team of four; I built the API.

Experience

Student Technician (part time) at Georgia State University IT Help Desk, Atlanta, GA January 2025 - Present

- Answer about 40 student and staff requests a week for accounts, Wi-Fi and laptops
- Wrote eight how-to articles for the help desk knowledge base; two are among the most viewed pages

Peer Tutor, Intro to Programming at Department of Computer Science, Atlanta, GA August 2024 - Present

- Run two weekly drop-in sessions for Python and debugging

Skills

Languages: Python, Java, JavaScript, SQL
Web: React, Node.js, Express, HTML, CSS
Tools: Git, GitHub, VS Code, Linux command line

Certificates

AWS Certified Cloud Practitioner from Amazon Web Services June 2025

Volunteering

Volunteer Instructor at Girls Who Code, Atlanta Chapter, Atlanta, GA September 2024 - Present
Teach weekly Scratch and Python lessons to middle school students.
