Profile

Project manager with twelve years of delivering software and infrastructure projects for healthcare, logistics and telecom companies. I run projects of 10 to 40 people, keep budgets honest and write status reports that executives actually read.

Experience

Senior Project Manager at Summit Health Systems, Denver, CO

May 2020 - Present

- Led the move of patient scheduling to a new platform across 14 clinics: \$3.2M budget, 35 people across IT, operations and the vendor
- Delivered the go-live two weeks early by running the clinic rollouts in three waves instead of one
- Set up a shared risk log and weekly steering meeting that became the standard for the PMO
- Manage three project coordinators and review their plans and budgets

Project Manager at Rocky Freight, Denver, CO

March 2016 - April 2020

- Ran the rollout of a warehouse management system to six distribution centers
- Introduced two-week sprints for the internal development team and a shared backlog in Jira
- Negotiated a change order with the vendor that saved \$180K in license fees
- Built the first project intake process for IT, which cut unplanned work requests to the development team by about a third

Project Coordinator at Front Range Telecom, Denver, CO

June 2014 - February 2016

- Coordinated fiber installation projects across 20 business sites with field crews and permitting offices
- Kept the project schedule and budget tracker up to date and prepared weekly status reports
- Organized vendor meetings and tracked action items to closure

Skills
