PROFILE

Backend engineer with nine years of experience building payment, logistics and order systems in Go and TypeScript. I like owning a service from design review to on-call, and I care about clear APIs, boring deployments and code the next person can read.

EXPERIENCE

- Senior Software Engineer at Larkspur Commerce, Austin, TX

March 2022 - Present

 - Led the split of the checkout monolith into four Go services, shipped behind feature flags with no customer-facing downtime
 - Cut p95 checkout latency from 900 ms to 240 ms by caching price rules and removing two synchronous calls
 - Designed the idempotency layer for card payments, which ended duplicate charges during retries
 - Mentor three engineers and run the weekly design review for the payments team
- Software Engineer at Brightline Logistics, Dallas, TX

June 2019 - February 2022

 - Built the shipment tracking API in TypeScript and Node.js, used by 40 partner carriers
 - Moved nightly batch jobs to an event queue, so customers saw status updates in minutes instead of the next morning
 - Added contract tests between services and brought failed deploys down from weekly to rare
 - Ran the Postgres upgrade from version 10 to 14 across three clusters with under five minutes of read-only time
- Junior Software Engineer at Pinecrest Software, Dallas, TX

June 2017 - May 2019

 - Built internal reporting tools in Python and Django for the sales and support teams
 - Wrote the first automated test suite for the billing module, which caught several regressions before release
 - Took part in the on-call rotation from the second year and wrote runbooks for the most common alerts

SKILLS

Languages: Go, TypeScript, Python, SQL
Backend: REST and gRPC APIs, PostgreSQL, Redis, Kafka
Infrastructure: AWS, Docker, Kubernetes, Terraform, GitHub Actions
Practices: System design, code review, observability, incident response

PROJECTS

- pgmigrate • [GitHub](#)

January 2021 - Present

Small open source tool for running PostgreSQL migrations safely in CI.

EDUCATION

B.S. Computer Science at University of Texas at Dallas, Richardson, TX August 2013 - May 2017

CERTIFICATES

- AWS Certified Developer - Associate from Amazon Web Services

February 2023
- Certified Kubernetes Application Developer (CKAD) from The Linux Foundation

April 2024

LANGUAGES

English - Native
Spanish - Conversational

VOLUNTEERING

- Volunteer Mentor at Austin Code Mentors, Austin, TX

September 2021 - Present

Review code and run mock interviews for career changers learning backend development.
